

6 TIPS TO CONSERVE WATER & save money this summer

50% of water used for outdoor purposes during the summer goes to waste

Check For Leaks

Walk around your landscaped area to make sure there are no leaks in your watering systems.

Sweep Up Messes

Rather than using a hose to spray a mess away, use a broom to clean patios, decks and sidewalks.

Mindful Car Washing

Avoid wasting water with a running hose. Instead, fill a soapy bucket with water so you can wash and rinse when needed.

Mulch Planted Areas

Mulching flower beds and planted areas can help retain moisture and prevent weeds. Two to three inches of mulch should do the trick.

Timely Watering

Water your lawn and plants early in the morning or later in the evening to avoid quick evaporation from the sun.

Reuse Rainwater

Collect water in rain barrels so you can later water your outdoor plants without running the hose.
